Mohamed Nazeer Husian MH

Software Engineer / Front-End Developer (React.js)

Chennai, Tamil Nadu, India — open to Hyderabad & Bengaluru | mohamednazeer710@gmail.com | +91 8870745262

LinkedIn: linkedin.com/in/mohamednazeer710 | GitHub: github.com/NAZEEER

PROFESSIONAL SUMMARY

Results-driven **Software Engineer / Front-End Developer** with hands-on experience in **software development and testing**. Built 5+ responsive, performance-optimized web applications using **React.js, JavaScript (ES6+), HTML5, and CSS3** — including a virtualized infinite-scroll feed powered by a REST API, an AI chatbot UI integrating the **OpenAI API**, and a portfolio site scoring **100% on Lighthouse**. Practical QA exposure through **manual testing, debugging (Chrome DevTools), and cross-browser web testing**. **BCA graduate (CGPA 7.0/10)**, based in **Chennai**, open to Hyderabad / Bengaluru, and available to join immediately.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, React Hooks, React Router, Tailwind CSS, Bootstrap, Vite

Testing & QA: Manual Testing, Web Testing, Application Testing — debugging with Chrome DevTools, cross-browser checks, Lighthouse audits, bug fixing

Concepts: Component-Based Architecture, Responsive Design, REST APIs, JSON, State Management (Hooks), Web Performance Optimization

Tools & Platforms: Git, GitHub, VS Code, Figma, npm

Practices: Agile / Scrum, Version Control, Code Review, Clean Code

AI & Emerging: OpenAI API, Next.js (learning)

PROJECTS

Infinite Feed — Virtualized Product Feed

React.js, Vite, JavaScript (ES6+), REST API | github.com/NAZEEER/infinite-feed

- Built an infinite-scrolling product feed that fetches paginated data from the **DummyJSON REST API** (limit/skip) with loading, error, and end-of-list states.
- Implemented **custom list virtualization (windowing)**: dynamic item measurement with ResizeObserver, binary-search visible-range calculation, overscan buffering, and scroll anchoring — rendering only visible items for smooth performance with large datasets.
- Managed state, side effects, refs, and memoization with React Hooks (useState, useEffect, useMemo, useRef, useLayoutEffect).
- **Manually tested and debugged** scroll, pagination, and rendering edge cases across browsers using Chrome DevTools.

AI Chatbot Interface

React.js, OpenAI API, Tailwind CSS

- Built an interactive chatbot UI that integrates the **OpenAI API** for real-time responses, with async request handling and error states.
- Designed **reusable, component-based UI** elements with a focus on seamless UX and clean, maintainable code.
- **Validated UI behavior through manual testing** and iterative bug fixing.

Weather Dashboard

JavaScript (ES6+), OpenWeatherMap REST API, CSS3

- Created a dynamic weather dashboard consuming the **OpenWeatherMap REST API** for real-time updates using async/await and JSON parsing.
- Implemented interactive UI elements and **responsive design**; tested across devices and screen sizes.

Task Manager App

React.js, React Hooks, localStorage

- Developed a full **CRUD** task manager using **React Hooks** for state management and the localStorage API for persistence.
- Tested create / read / update / delete flows and edge cases.

Portfolio Website

React.js, Tailwind CSS

- Built a personal portfolio with React.js and Tailwind CSS; optimized to a **100% Lighthouse score** (performance, accessibility, best practices, SEO).

EDUCATION

Annamalai University, Chidambaram — Bachelor of Computer Application (BCA) | 2022 – 2025 | CGPA: 7.0/10

BCA is listed in the role's eligibility criteria (BE, BTech IT, BSc CS, BCA, ME, MTech, MCA, MSc IT).

ADDITIONAL

- Based in **Chennai**; open to **Hyderabad, Bengaluru**, and relocation — available for **immediate joining** (full-time, permanent roles).
- Quick learner; strong interest in AI-integrated web experiences and modern front-end tooling.
