Mohamed Nazeer Husian MH

Front-End Developer (React.js) — Junior / Entry-Level Software Developer
Chennai, Tamil Nadu, India | mohamednazeer710@gmail.com | +91 8870745262
LinkedIn: linkedin.com/in/mohamednazeer710 | GitHub: github.com/NAZEEER

PROFESSIONAL SUMMARY

Front-End Developer with hands-on experience building responsive, performance-optimized web applications using **React.js, JavaScript (ES6+), HTML5, and CSS3**. Shipped 5+ projects, including a **virtualized infinite-scroll feed** that renders large datasets efficiently, an **AI chatbot UI** integrating the OpenAI REST API, and a portfolio site scoring **100% on Lighthouse**. Solid foundation in React Hooks, component-based architecture, REST API integration, responsive design, Git version control, and Agile collaboration. BCA graduate (CGPA 7.0/10) eager to contribute clean, maintainable code to an innovative product team.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks & Libraries: React.js, React Hooks, React Router, Tailwind CSS, Bootstrap, Vite
Concepts: Component-Based Architecture, Responsive Design, REST APIs, JSON, State Management (Hooks), Web Performance Optimization, Accessibility, Cross-Browser Compatibility
Tools & Platforms: Git, GitHub, VS Code, Chrome DevTools, Figma, npm
Practices: Agile / Scrum, Version Control, Code Review, Debugging, Clean Code
AI & Emerging: OpenAI API, Next.js (learning)

PROJECTS

Infinite Feed — Virtualized Product Feed

React.js, Vite, JavaScript (ES6+), REST API | github.com/NAZEEER/infinite-feed

- Built an infinite-scrolling product feed that fetches paginated data from the **DummyJSON REST API** (limit/skip) with loading, error, and end-of-list states.
- Implemented **custom list virtualization (windowing)**: dynamic item measurement with ResizeObserver, binary-search visible-range calculation, overscan buffering, and scroll anchoring — rendering only visible items to keep the UI smooth with large datasets (**performance optimization**).
- Managed state, side effects, refs, and memoization with React Hooks (useState, useEffect, useMemo, useRef, useLayoutEffect).

AI Chatbot Interface

React.js, OpenAI API, Tailwind CSS

- Built an interactive chatbot UI that integrates the **OpenAI API** for real-time responses, with async request handling and error states.
- Designed **reusable, component-based UI** elements with a focus on seamless UX and clean, maintainable code.

Weather Dashboard

JavaScript (ES6+), OpenWeatherMap REST API, CSS3

- Created a dynamic weather dashboard consuming the **OpenWeatherMap REST API** for real-time updates using async/await and JSON parsing.
- Implemented interactive UI elements and **responsive design** for consistent engagement across devices.

Task Manager App

React.js, React Hooks, localStorage

- Developed a full **CRUD** task manager using **React Hooks** for state management and the localStorage API for persistence.

Portfolio Website

React.js, Tailwind CSS

- Built a personal portfolio with React.js and Tailwind CSS; optimized to a **100% Lighthouse score** (performance, accessibility, best practices, SEO).

EDUCATION

Annamalai University, Chidambaram — Bachelor of Computer Application (BCA) | 2022 – 2025 | CGPA: 7.0/10

ADDITIONAL

- Open to remote, hybrid, or on-site opportunities; willing to relocate.
- Quick learner with a strong interest in AI-integrated web experiences and modern front-end tooling.
